

## Projects – Domestic Solar

August 2011 – ongoing

Stage Two of the Federal Government Solar Program was offered towards in 2011 when Keppel Prince began our Solar Business Group.

Since installing our first domestic solar systems on May 1<sup>st</sup>, 2011, Keppel Prince has installed approximately 878 domestic systems in Southwest Victoria and the Goulburn Valley. Using our parent company's extensive industry networks and our local purchasing power, Keppel Prince is able to pass purchasing cost savings through to customers, offering price competitive systems using quality components and experienced installers.

Any questions regarding domestic solar can be directed to:
